

# Kendall Drive Premium Transit PD&E Study

## Project Kick-Off Meeting

SR 94/Kendall Drive/SW 88 Street Project Development and Environment (PD&E) Study  
From SR 997/Krome Avenue/SW 177 Avenue to Dadeland North Metrorail Station  
Miami-Dade County, Florida

ETDM Number: 14251

Financial Project Number 437784-1-22-01

FDOT is doing a  
**STUDY FOR**  
**PREMIUM TRANSIT**  
to be used along Kendall Drive

The Kendall Corridor is  
currently experiencing significant  
**CONGESTION...**

A photograph of a road construction site. In the foreground, a metal guardrail runs along the side of a road. A black traffic sign is mounted on a pole next to the guardrail. A yellow sign is also visible. The background features a grassy field, trees, and a clear sky. The text is overlaid on the bottom left of the image.

...and needs  
improvements to  
**sidewalks and  
bike lanes.**

We want to help  
**improve the**  
transit services...

So that  
getting  
around...

...from one  
end to  
another...

...is easy and convenient!

Our study on  
**Kendall Drive** begins at...

Krome Ave

Dadeland North  
Metrorail Station

Kendall Drive

94

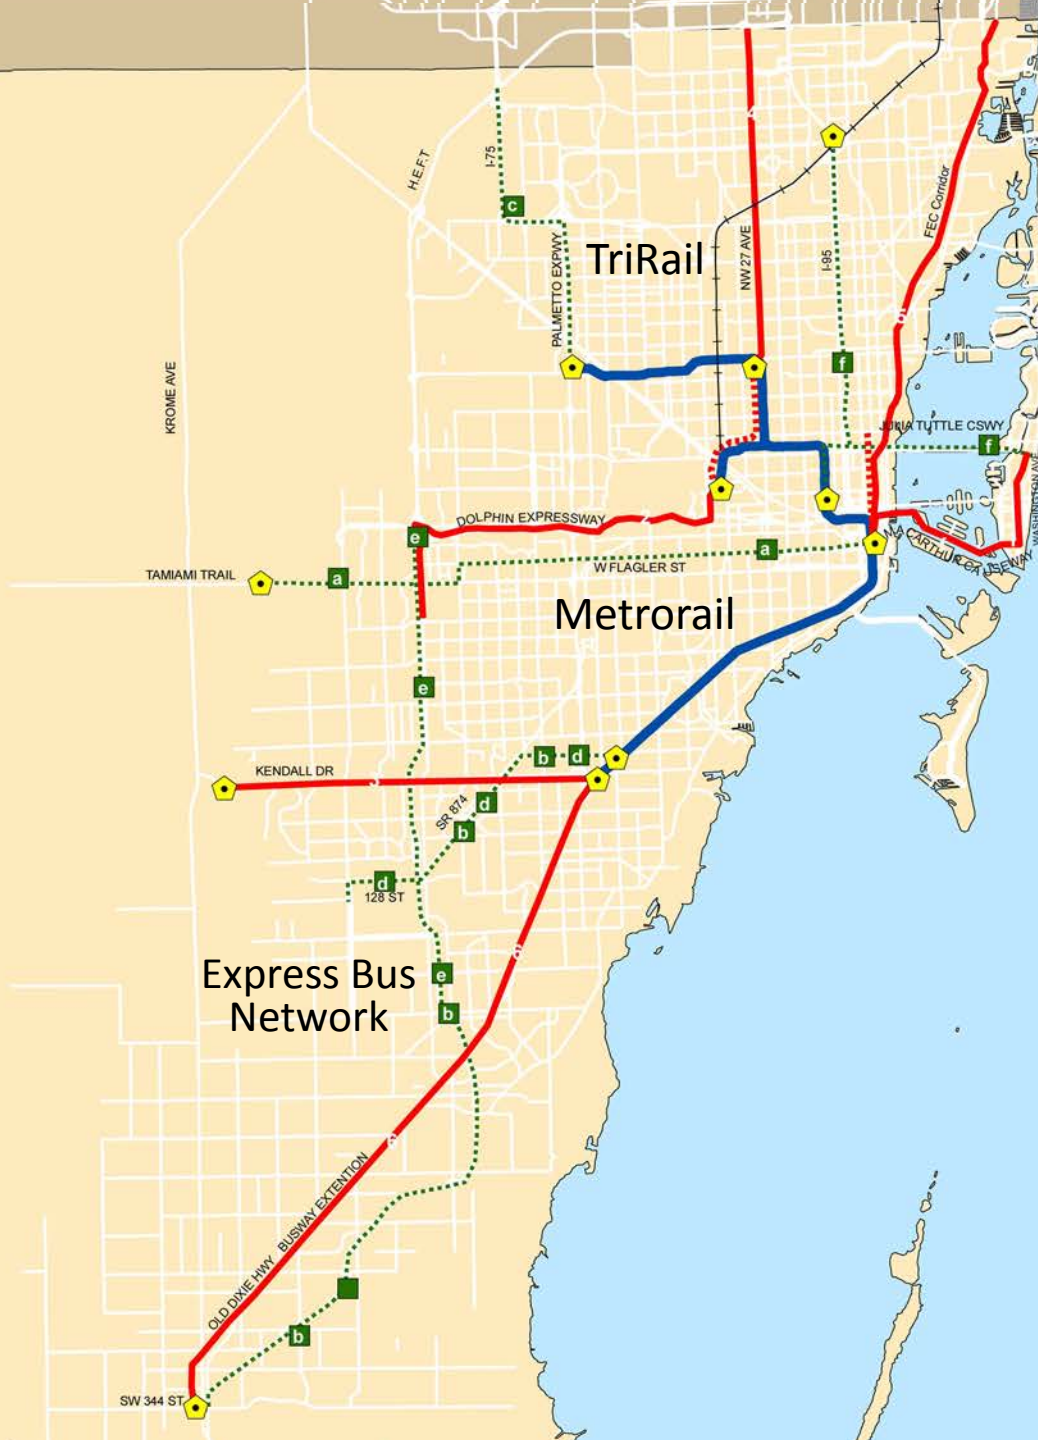

1

That's a total length of 10.7 miles

It's all part of the  
**SMART**  
**PLAN**

Strategic  
Miami  
Area  
Rapid  
Transit

# SMART PLAN

consists of...

**six rapid  
transit  
corridors**

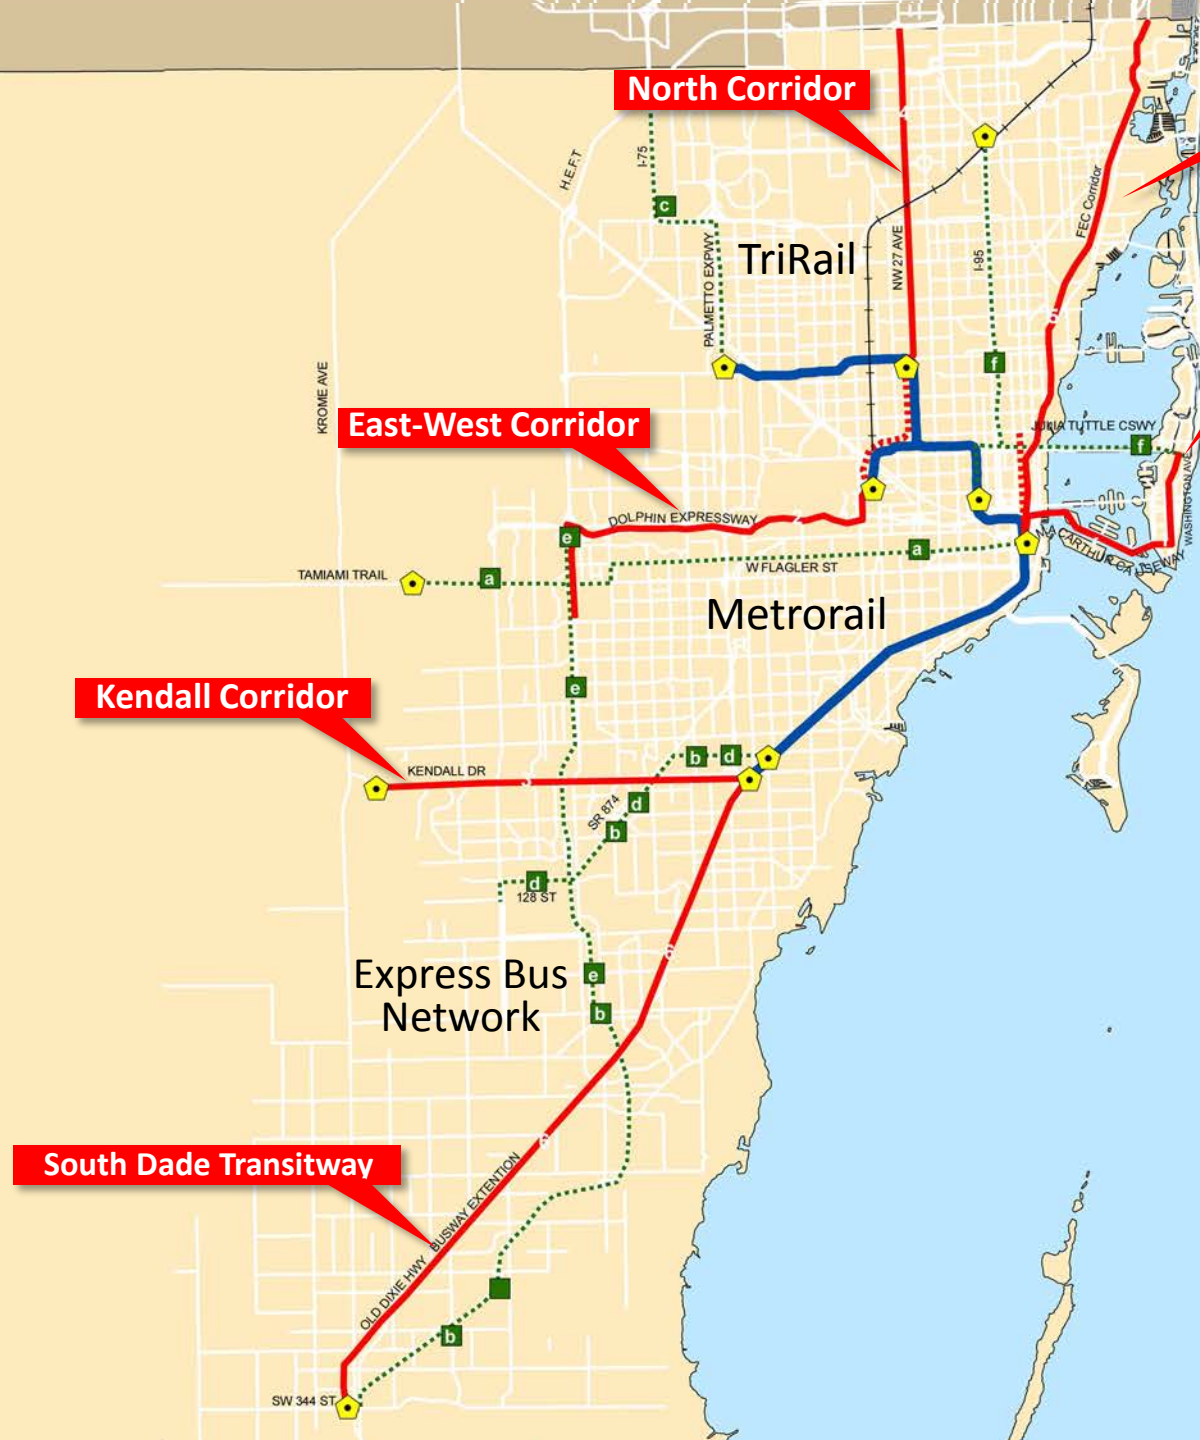

*Just  
Imagine...*

# SMART PLAN

A network of corridors  
that will help make the  
**connection**  
to getting around in  
South Florida

**SMART  
PLAN**  
will analyze  
**premium  
transit  
technology  
alternatives**

# What is **premium transit** technology?

# Bus Rapid Transit (BRT)

A high-capacity urban bus transit service with a dedicated right-of-way.

Featured is an articulated bus part of the Lyon Public Transport Network in France.

# Light Rail Transit (LRT)

Also known as trolleys or streetcars generally electrically propelled rail vehicle.

Featured is the Phoenix Metro Light Rail in an exclusive lane.

# Heavy Rail Transit (HRT)

An electric railway characterized by high speed and rapid acceleration operating on fixed rails.

The Metrorail provides service throughout Miami-Dade County.

# Metrorail At-Grade

Train can switch from  
an elevated platform  
to street level service.

Featured is the MBTA  
Blue Line located  
downtown Boston.

# Premium Transit

Convenient  
Reliable  
Efficient

*Just Imagine...*

**Utilizing the  
latest in Fare  
Collection  
Technology**

# Modernized Stations

Designed for comfort with quick and easy boarding.

# Adding to Transit Tracker

Real time "Next Arrival" displays at the station.

So how does  
**Premium Transit**  
help with traffic?

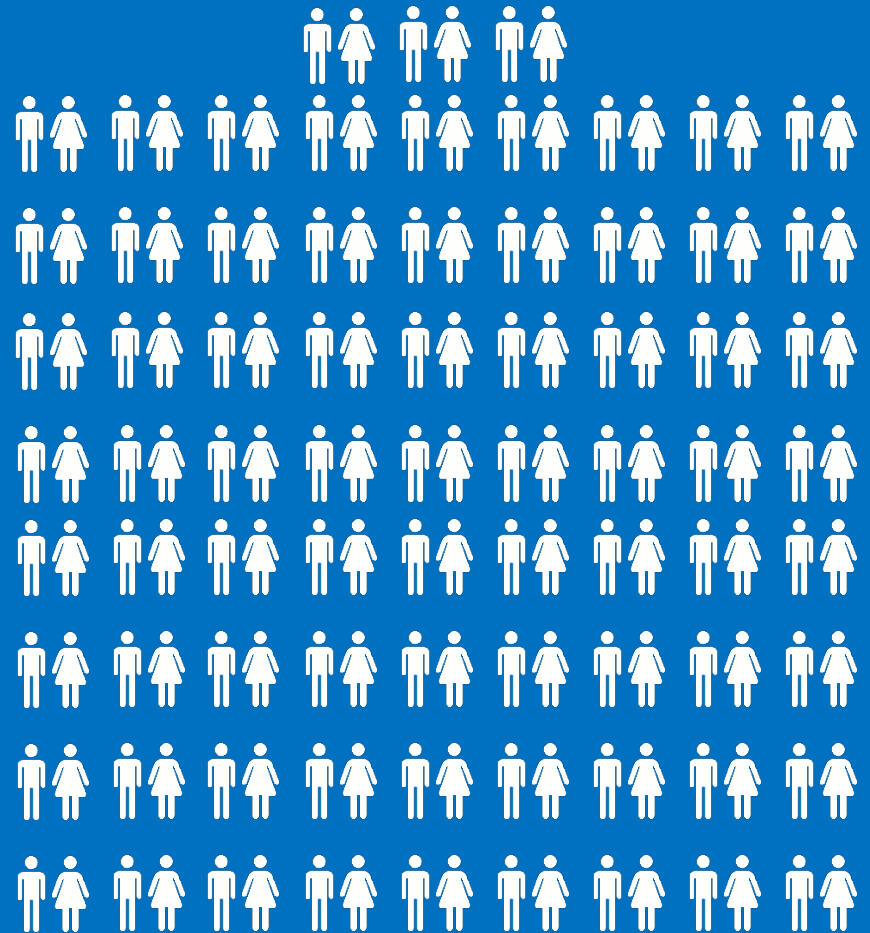

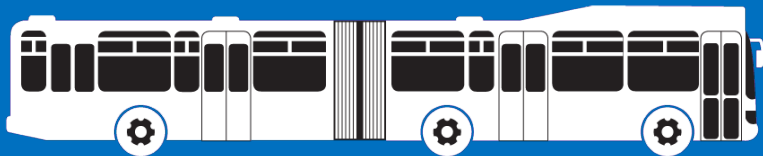

*Just Imagine...*

**One BRT**

vehicle can carry

**150**

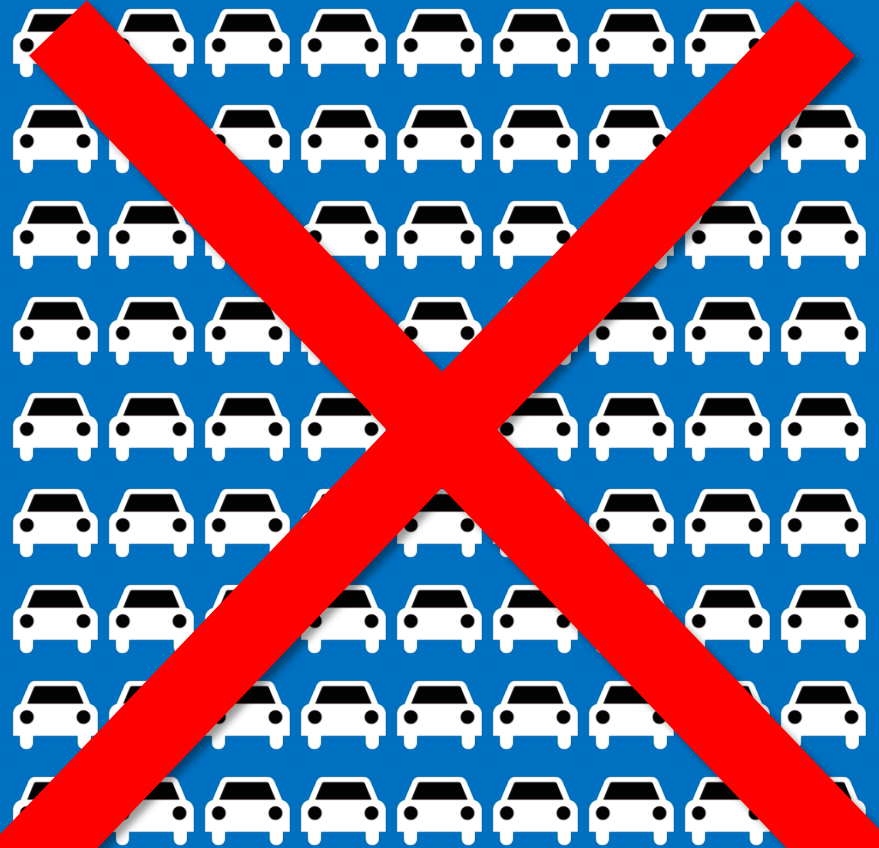

passengers

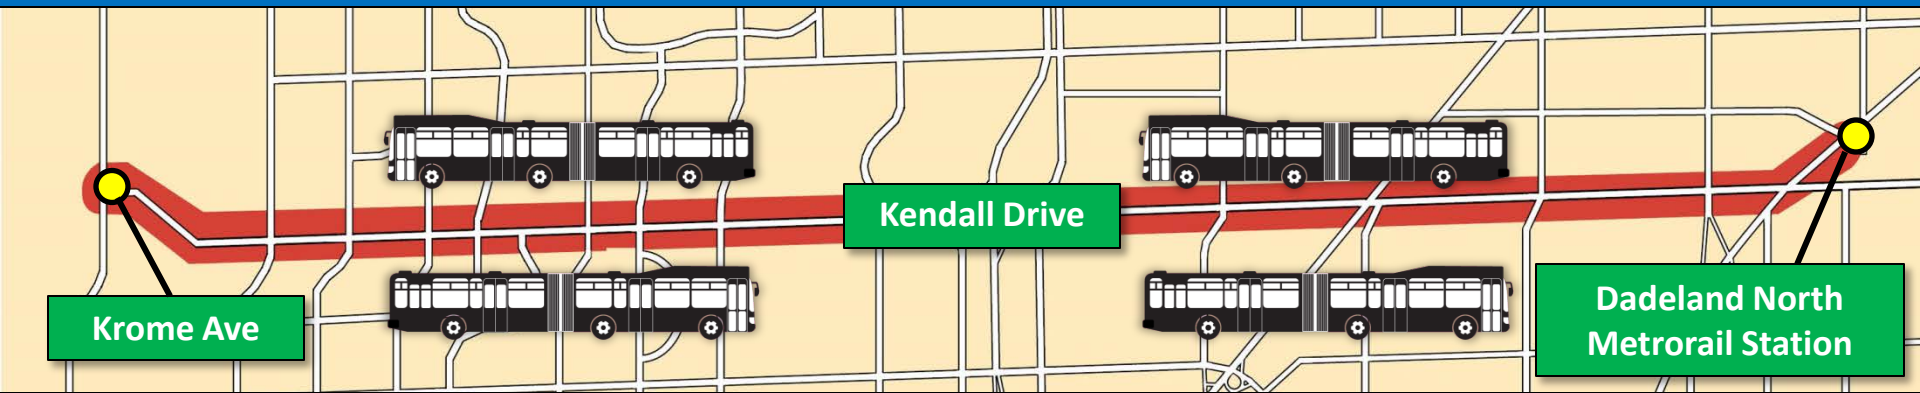

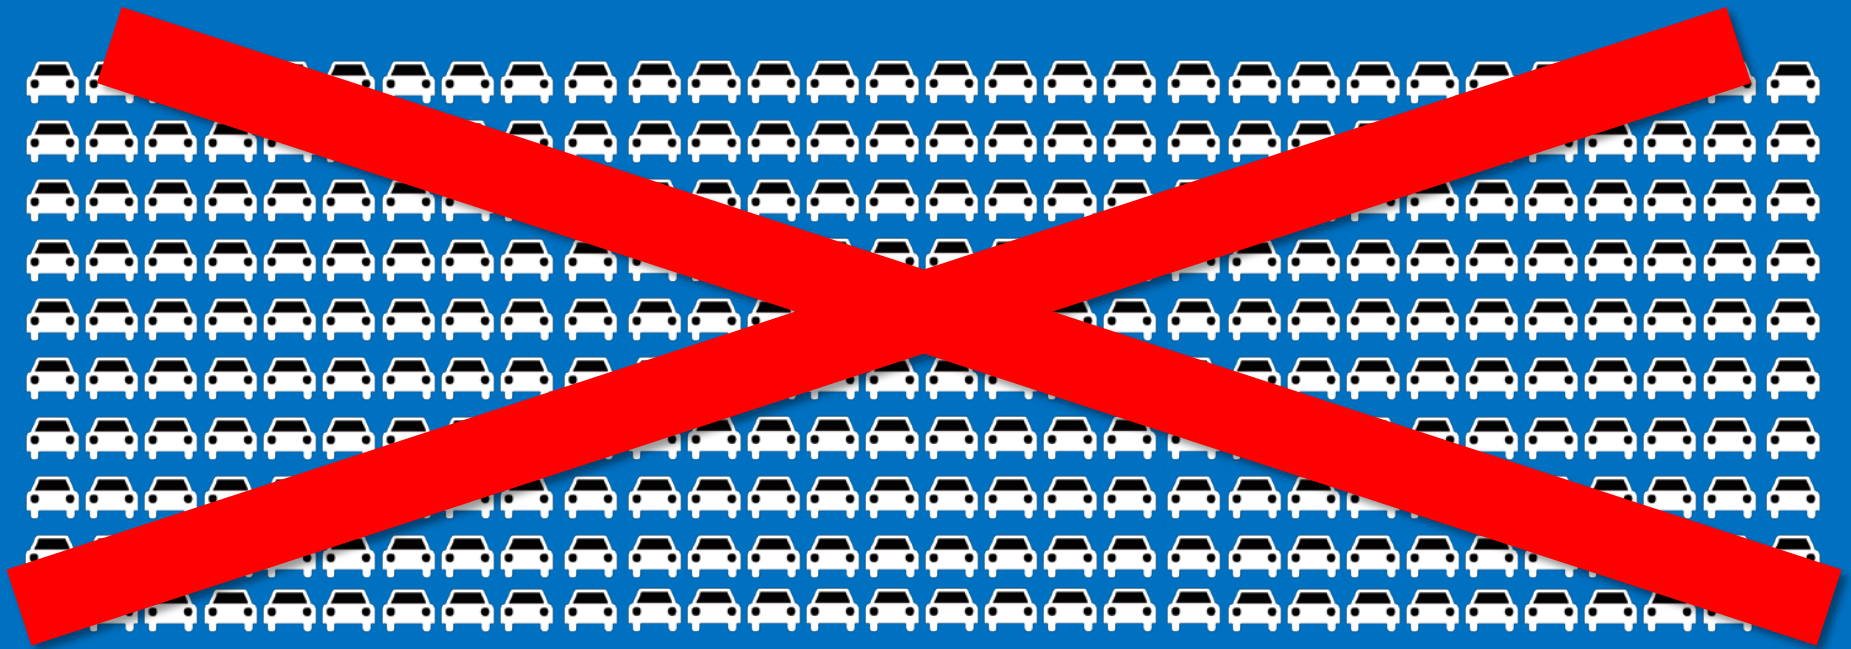

If two people rode in each  
car that would be

**75**

vehicles off the road.

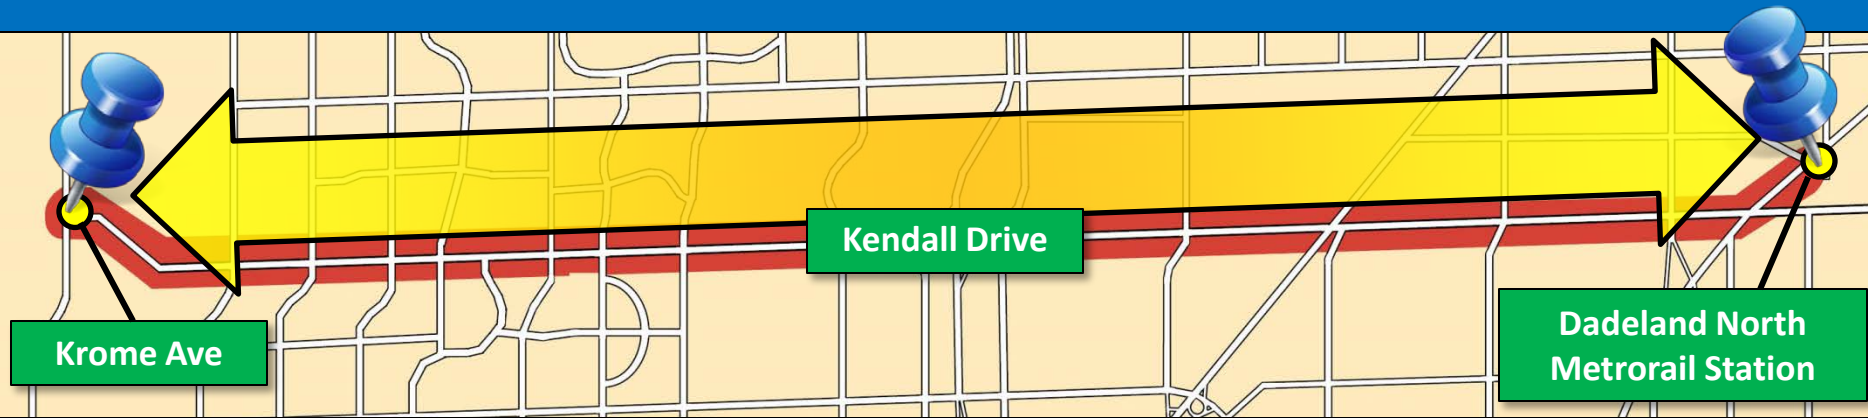

If four BRT vehicles  
where in circulation...

**300**

...vehicles could be  
taken off the road.

During peak times weekdays East and West trips (9am, Noon, 5pm)  
to travel from Krome Ave to the Dadeland North Metrorail Station  
**can be about an hour ride.**

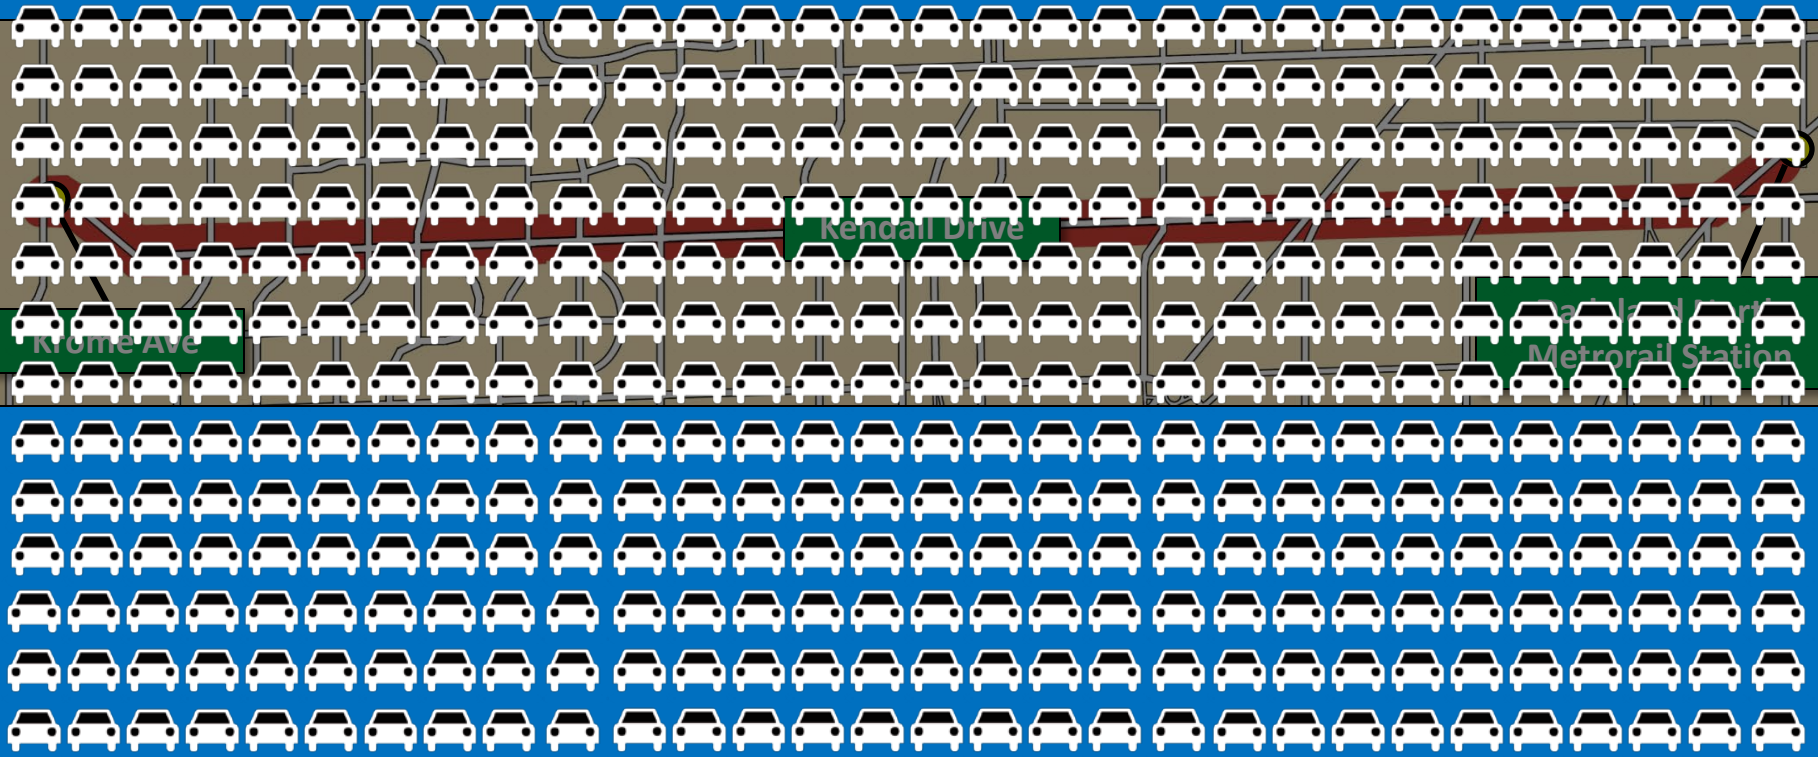

*Just Imagine...*

If we can cut that time **in half!**

If we do nothing...

# The congestion doesn't go away.

Especially as the...  
population and employment  
continues to **grow** in the area!

*Just Imagine...*

Premium transit provides economic opportunities for every...

**\$10 million**

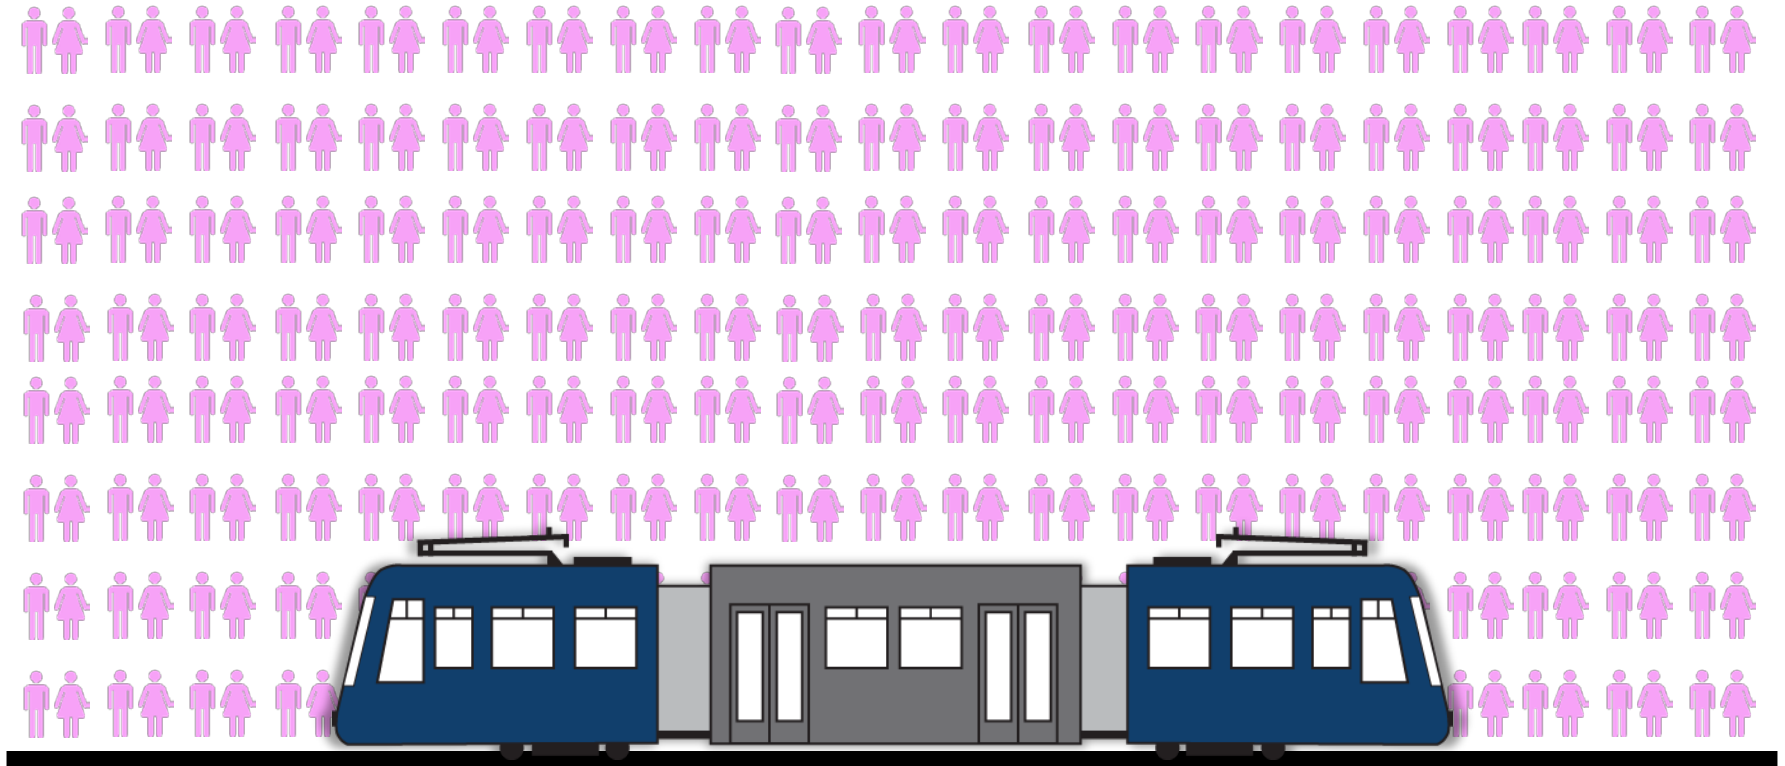

in capital investment in  
public transportation yields

**\$30 million**

in increased  
business sales.

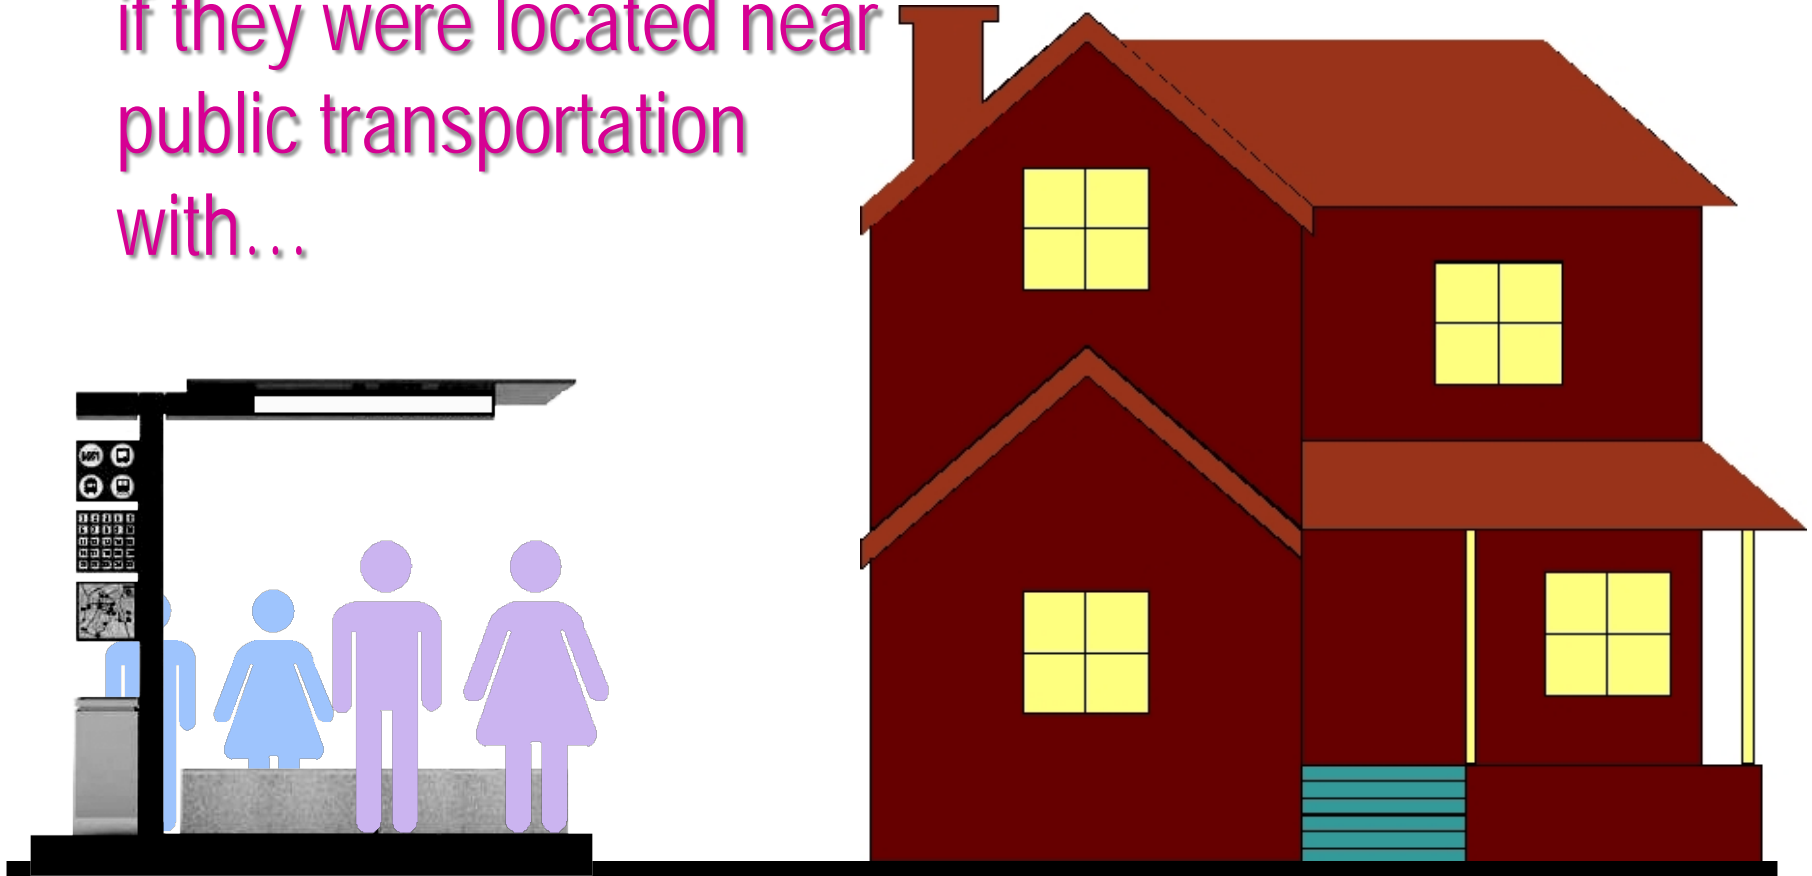

Every \$1 billion invested in public transportation...  
supports and creates more than

**50,000 jobs**

Home values performed 42% better, on average...  
if they were located near  
public transportation  
with...

...high-frequency service.

What is the process and...

# what are the next steps?

Introduce  
the project

**FALL  
2016**

Develop  
Alternatives

**SPRING  
2017**

Analyze Viable  
Alternatives

**FALL  
2017**

Select Preferred  
Alternative

**SPRING  
2018**

# We want to hear from.... **you!**
